Mycopathologia **129**: 191–192, 1995.

CONTENTS VOLUME 129

No. 1

HUMAN AND ANIMAL MYCOLOGY

Application of the API YeastIdent system in determining the enzymatic profiles of *Nocardia asteroides* isolates - S. Richter, J. Kane, R.C. Summerbell, S. Krajden & B. Diena 1–4

Fungal contamination and selected mycotoxins in pre- en post-harvest maize in Honduras - A.M. Julian, P.W. Wareing, S.I. Philips, V.F.P. Medlock, M.V. MacDonald & L.E. del Río 5–16

Histoplasmosis in northwestern Argentina, II: Prevalence of *Histoplasmosis capsulati* and Paracoccidioidomycosis in the population south of Chuscha, Gonzalo and Potrero in the province of Tucuman - A. van Gelderen de Komaid & E.L. Durán 17–23

Isolation of *Cryptococcus neoformans* var. *neoformans* from bird droppings, fruits and vegetables in Mexico City - R. López-Martínez & L.R. Castañón-Olivares 25–28

MYCOTOXICOSES AND MYCOTOXINS

Toxic interaction of fumonisin B_1 and fusaric acid measured by injection into fertile chicken egg - Ch. W. Bacon, J.K. Porter & W.P. Norred 29–35

***

Book reviews - E. Castañeda / E.E. Butler 37–38

IMI Descriptions of Fungi and Bacteria, Set 123, Nos. 1221-1230 - J.C. David & J. Kelly 39–62

Instructions to Authors 63–64

No. 2

HUMAN AND ANIMAL MYCOLOGY

Induction of novel protein synthesis by opsonized *Histoplasma capsulatum* ingested by murine peritoneal macrophages - K. Kamei, E. Brummer, K.V. Clemons & D.A. Stevens 65–72

Effects of butylated hydroxyanisole, butylated hydroxytoluene and tertiary butylhydroquinone on growth and luteoskyrin production by *Penicillium islandicum* - H.-H. Tseng & T.-C. Tseng 73–78

An outbreak of dermatopytosis in pigs caused by *Microsporum canis* - J.F. González Cabo, M.C. Bárcena Asensio, F. Gómez Rodriguez & J.A. Amigot Lázaro 79–80

Keratinophilic fungi from soil of Brittany, France - M. Agut, M. Bayó, J. Larrondo & M.A. Calvo 81–82

Isolation of keratinolytic fungi from a coal mine dump - K. Ulfig & M. Korcz 83–86

PLANT MYCOLOGY AND CROP PROTECTION

The occurrence of *Phytophtohora heveae* in mainland China - K.M. Zhang, H.H. Ho & J.Y. Lu 87–90

Infection and disintegration of vascular tissues of non-suberized roots of spruce by *Heterobasidion annosum* and use of antibodies for characterizing infection - F.O. Asiegbu, G. Daniel & M. Johansson 91–101

MYCOTOXICOSES AND MYCOTOXINS

A novel glass fiber disc culture system for testing of small amounts of compounds on growth and aflatoxin production by *Aspergillus flavus* - R.A. Norton 103–109

Production of gliotoxin during the pathogenic state in turkey poults by *Aspergillus fumigatus* Fresenius - J.L. Richard & M.C. DeBey 111–115

Enterobacter cloacae is an endophytic symbiont of corn - D.M. Hinton & C.W. Bacon 117–125

No. 3

Special theme: The European Fusarium sambicinum project

Guest Editor: Helgard I. Nirenberg

Editorial 127

Introduction 129

Morphological differentiation of *Fusarium sambucinum* Fuckel sensu stricto, *F. torulosum* (Berk. & Curt.) Nirenberg comb. nov. and *F. venenatum* Nirenberg sp. nov. - H.I. Nirenberg 131–141

Computer-aided morphometrical analysis of macroconidia in *Fusarium sambucinum* Fuckel sensu lato strains - B. Hagen & C. Hagen 143–147

Sexual fertility of forty *Fusarium* strains from the European *Fusarium sambucinum* project - A.E. Desjardins & P.E. Nelson 149–151

Phylogenetic relationship within *Fusarium sambucinum* Fuckel sensu lato, determined from ribosomal RNA sequences - A. Logrieco, S.W. Peterson & A. Bottalico 153–158

Differentiation of *Fusarium sambucinum* Fuckel sensu lato and related species by RAPD PCR - O. Hering & H.I. Nirenberg 159–164

Analysis of esterase zymograms of *Fusarium sambucinum* and related species - Á. Szécsi, Gy. Turóczi & B. Bordás 165–171

Toxicity of *Fusarium sambucinum* Fuckel sensu lato to Brine Shrimp - R. Schmidt, P. Zajkowski & J. Wink 173–175

Production of type A trichothecenes and enniatin B by *Fusarium sambucinum* Fuckel sensu lato - C. Altomare, A. Logrieco, A. Bottalico, G. Mulé, A. Moretti & A. Evidente 177–181

Chemical and physiological characterization of taxa in the *Fusarium sambucinum* complex Ulf Thrane & Ulla Hanssen 183–190

Volume Contents 191–192
